About Me

“

I started programming at 8, starting with lego educations and scratch. This early exposure quickly developed into a passion and I took C++ classes from when I was 11 to 14. At 16 I learned the basics of Flutter and my journey started: ”

Professional Experience

09.20 - Today **OutLearn:**

Developed, released & maintaining a learning app using Flutter

- Live updates using web sockets
- Using Hive for offline usage
- State management using hiveBuilder and change notifiers providers
- Stable revenue and thousands of happy users

01.22 - Today **Freelance Fullstack developer:**

Making mobile&web apps for Clients

Worked on 5 mobile&web apps using Flutter & node.js
Advised on which technologies to use, how to structure the project
All clients very happy, see testimonials and project details on portfolio

Personal Projects

2022 **TarAdvent:**

Developed an advent calendar app for my girlfriend & family

- Different Calendar content for each person
- Sign Into a calendar using a code

2022 **Blog 42:**

Designed and developed a beautiful blog template

2020- Today **Small other projects available on GitHub**

2017- 2021

Robotics: Built robots with Arduino & lego mindstorm

- Used lego mindstorm to solve real world problems (video game farming, shiny pokemon hunting)
- Won Arduino competition at school and went to finals in Frankfurt (Concours Robot LFVH)

Other Interests

Traveling & Drone Filming (Showcase on Portfolio)

Music – Piano&Cello

Sailing: Catamaran Sailing Instructor License
